I am writing to the FCC to urge it to reject the National Association of Broadcasters petition 04-160. I am a subscriber to XM satellite radio and find the quality of its content to be unavailable anywhere else in the market. I find the traffic and weather channels to be of great utility and since I am willing to pay for this content I don't think that the National Association of Broadcasters should be allowed to tell me what I can and can't listen to.

I respectfully ask that the FCC reject the petition of the National Association of Broadcasters in their attempt to take away choices from the listening public
